Subject: Material from Paris-NCNA Peking circuit

After discussion with FOS, it has been decided to handle material on the Paris-NCNA Peking circuit in the following manner.

Where it is clearly stated that a particular item originates in a specific country--regardless of the mode of transmission--the material should be handled as a correspondent's dispatch from the specified country.

This also applies to material which is stated to have been received in Paris (or London) by airmail. For example, if the material states that the item was received in London from Guatemala by airmail, the source line should read: Guatemala City Correspondent's dispatch in (language) to NCNA Peking.

In cases where it cannot be determined that an item originates in a specific country, the source line should read: Paris Correspondent's dispatch in (language) to NCNA Peking.
